EDUCATION

National University of Sciences and Technology (NUST), SEECS
Bachelor of Engineering in Electrical Engineering (Third Year)

Islamabad, Pakistan
Sep. 2024 – Sep. 2028 (Expected)

EXPERIENCE

Verafo

Co-Founder, Technical Lead

Aug. 2026 – Present

Islamabad, Pakistan

- Lead the tech side of Pakistan's first e-commerce prediction engine, scoring each COD buyer's refusal risk
- Built the **Shopify app** (Remix, Shopify Functions, Polaris, Supabase, Prisma) with one-click install, merchant-configurable checkout rules and a returns dashboard
- Pilot results: **18% fewer returns** for one brand in 30 days and **16% sales growth** for another;
5+ e-commerce brands on the network

NUST Chip Design Centre

Digital Verification Intern

Jun. 2026 – Aug. 2026

Islamabad, Pakistan

- Developed **SystemVerilog/UVM** testbenches to verify digital designs in **Cadence Xcelium**
- Performed functional verification, debugging and coverage analysis using industry-standard methodology

Freelance

AI Automation Engineer

2026 – Present

Remote

- Designed and deployed a **24/7 AI booking agent** for an international salon in Belgium; its calendar went from **empty to fully booked**, with bookings filling within **2 days** of launch
- Built on **n8n** with LLM tool-calling, live calendar availability checks, in-chat payment-proof uploads and automatic booking records via Google Workspace APIs

PROJECTS

Echo, Self-Learning AI Support Agent | *n8n, Gemini, RAG, Supabase pgvector, WhatsApp API* [Live demo](#)

- Built a RAG support agent that answers only from a business's own documents and escalates uncertain questions to the owner on WhatsApp instead of guessing
- Owner replies are embedded into the vector store automatically, so the agent learns every answered question

Ledger, AI Invoice Auditor | *n8n, Gemini Document AI, Supabase, Node.js*

[Live demo](#)

- Reads supplier invoice PDFs with AI and holds **duplicates, overcharges, wrong totals and changed bank details** before payment; flagged **PKR 101K** in the demo inbox
- Designed one rules engine covered by **11 automated tests** and shared by the n8n workflow and web demo, so every verdict is explainable

Nova, AI Receptionist | *n8n, AI Agent, Google Sheets*

[Live demo](#)

- Open-source template that answers FAQs from a Google Sheet, qualifies booking requests and logs every lead

Voice-Controlled Home Automation | *Arduino Mega, HC-05 Bluetooth, Embedded C*

- Controlled lights, a fan and a servo door lock by voice (Google Assistant over Bluetooth) through relay modules

PWM Buck Converter | *555 Timer, IRFZ44N MOSFET, Schottky Diode, LC Filter*

- Designed and built a step-down converter regulating **9–25 V** input to **1–24 V** (1.5 A max); **62.7% efficiency**

TECHNICAL SKILLS

Languages: C/C++, Embedded C, SystemVerilog, JavaScript, TypeScript, HTML/CSS, SQL

AI & Automation: n8n, LLM APIs (Gemini, OpenAI), RAG, pgvector, Tool-Calling, Prompt Engineering

Web & Cloud: Node.js, Remix, React, Shopify Functions, Polaris, Supabase, Prisma, Vercel, Git

Hardware & EDA: UVM, Cadence Xcelium, Proteus, Arduino, AutoCAD, 3D Printing
